Response Parameters

Response parameters that will always be returned

For each back-end operation in Wirecard Checkout Page (Toolkit light) and Wirecard Checkout Seamless the following parameter is returned.

Parameter	Data type	Short description
status	Numeric with a fixed length of 1.	Number representing the status of the operation.

This parameter will return one of the following values:

Value of parameter status	Description
0	Operation successfully done.
1	Error during request parameter verification.
2	Execution of operation denied.
3	Error within external financial institution.
4	Internal error.

Additional response parameters

Apart from this parameter, additional response parameters are returned which are specific to the particular back-end operation, both transaction-based and non-transaction-based operations. These back-end operation specific parameters are the same both for Wirecard Checkout Page and Wirecard Checkout Seamless.

Response parameters which will be returned in case of a failure

If the back-end operation was not successful, parameters describing the error are returned.

Wirecard Checkout Page

Parameter	Data type	Short description
errorCode	Numeric with a fixed length of 5.	Numeric error code which you should log for later use.

message	Alphanumeric with special characters.	Error message in English.
paySysMessage	Alphanumeric with special characters.	Error message specific to payment method and financial institution which is only relevant for merchant.
...	...	Additional parameters specific to operation.

Wirecard Checkout Seamless

Parameter	Data type	Short description
errors	Numeric	Number of errors occurred.
error.{n}.errorCode	Numeric with a fixed length of 5.	Numeric error code which you should log for later use.
error.{n}.message	Alphanumeric with special characters.	Error message in English.
error.{n}.consumerMessage	Alphanumeric with special characters.	Error message in localized language for your consumer.
error.{n}.paySysMessage	Alphanumeric with special characters.	Payment method system specific error message only relevant for merchant.
...	...	Additional parameters specific to operation.
