Recipient Data

For merchants with Merchant Category Code 6012 who reside in the UK, the following request parameters regarding recipient data may be required for Wirecard Checkout Page and Wirecard Checkout Seamless.

Parameter	Within fingerprint	Data type	Short description
recipientAccount	Required if used.	Alphanumeric with special characters and with a variable length of up to 30 characters.	PAN or account number of recipient.
recipientBirthDate	Required if used.	Date as "DD.MM.YYYY".	Date of birth of recipient.
recipientLastName	Required if used.	Alphabetic with a variable length of up to 15 characters.	Last name of recipient.
recipientZipCode	Required if used.	Alphanumeric with special characters and with a variable length of up to 10 characters.	Postal code of recipient.

Back-end operations

The **required order** of the parameter values when computing the **fingerprint** for Wirecard Checkout Seamless is: `customerId`, `shopId`, `password`, `secret`, `command`, `language`, `orderNumber`, `sourceOrderNumber`, `autoDeposit`, `orderDescription`, `amount`, `currency`, `orderReference`, `customerStatement`, `mandateId`, `mandateSignatureDate`, `creditorId`, `dueDate`, `transactionIdentifier`, `useIbanBic`, `recipientBirthDate`, `recipientAccount`, `recipientZipCode`, `recipientLastName`.
