# Setting up 3rd party permissions

To enable the integration of PayPal to your online shop in Wirecard Checkout Page or Wirecard Checkout Seamless we need certain “third party permissions” to your PayPal Business Account for accessing PayPal related payment information.

As for some languages PayPal has simplified the 3rd party permission setup, we recommend to **set the browser language to English** to display all available permissions.

## Step 1

If you do not already have a PayPal account, you need to register a PayPal Business Account at PayPal.

## Step 2

Follow the steps as described in the PayPal documentation Granting a Third-Party Permissions using “**office\_api1.genta.at**” as the “Third Party Permission Username”.

## Step 3

On the “Add New Third Party Permissions” page, select the following types of permissions and click “Add”.

- “Use Express Checkout to process payments.”
- “Issue a refund for a specific transaction.”
- “Authorize and capture your PayPal transactions.”
- “Obtain information about a single transaction.”
- “Charge an existing customer based on a prior transaction.”
- “Create and manage Recurring Payments.”
- “Use Express Checkout to process mobile payments.”

**Add New Third Party Permissions**

Manage permission given to a third-party application to access specific information in your account and take actions on your behalf.

For more information about the permissions you are granting, see [Third Party Permissions](#).
