Information on the protection of personal data for Wirecard Checkout Terminal
Overview

This chapter provides information on all data that are processed by our solution Wirecard Checkout Terminal (WCT).

Wirecard Checkout Terminal data processing volume increases with the services contracted. When ordering Wirecard Checkout Terminal, you may acquire

- 1 basic solution, optionally extendable with
- 1 to N payment methods, and/or
- 0 to N optional and additional features

Go to section "Data entered by the Merchant" for an overview on the processing of data (parameters) for a given payment transaction and the selected payment method. Furthermore, section Additional Features provides additional information on the processing of data (parameters) for each feature that was added to the basic solution.

Additionally, the general functioning of the product WCT - both in its basic version and when using different payment methods - is also described in detail here: Using WCT

Data entered by the merchant

All indicated parameters need to be processed to ensure that the solution Wirecard Checkout Terminal, basic version, meets our contractual obligations to the merchant (purpose of the processing of data):

The displayed parameters are subdivided into

- parameters processed irrespectively of the payment method (standard)
- parameters processed dependent on the respective payment method (payment method)

Dynamic Drop Down List
