Integration Guides now Online Guides

Welcome to the new **Online Guides with improved usability, look and feel!**

Since the Integration Guides have been running successfully for 2 years we decided to do some renaming and redesigning. The Online Guides are our centralized documentation of technical issues providing information for the integration of our payment solutions into your online shop. In addition they include integration examples and plugins for the most popular shop systems which you may download for free.

Your **username and password have not been changed**. And if you do not remember your password, just reset your password.

Please proceed to login to the new Online Guides ...
