# Wirecard Checkout Integration for SAP Business ByDesign

Wirecard Checkout Integration for SAP Business ByDesign integrates our product “Wirecard Checkout Seamless” (seamlessly integrated PCI DSS compliant solution, more sophisticated than classical payment page) with SAP.

This solution supports mail order/telephone order (MOTO) credit card and debit card transactions and back office transactions in which all major card brands are supported:

- Visa
- Mastercard
- American Express
- Diners Club
- Discover
- JCB
- Maestro (only for UK, Ireland, France)

We also provide efficient and proven fraud detection and risk management services which can additionally be used, helping you to decrease levels of fraud and risk without inhibiting any “good” business in order to ensure a positive influence on the overall turnover.

To get more information and to start the integration please contact us via [sap\\_businessbydesign@wirecard.com](mailto:sap_businessbydesign@wirecard.com) or by phone: +49 894424-1050.

You can find this integration also in the SAP App Center.

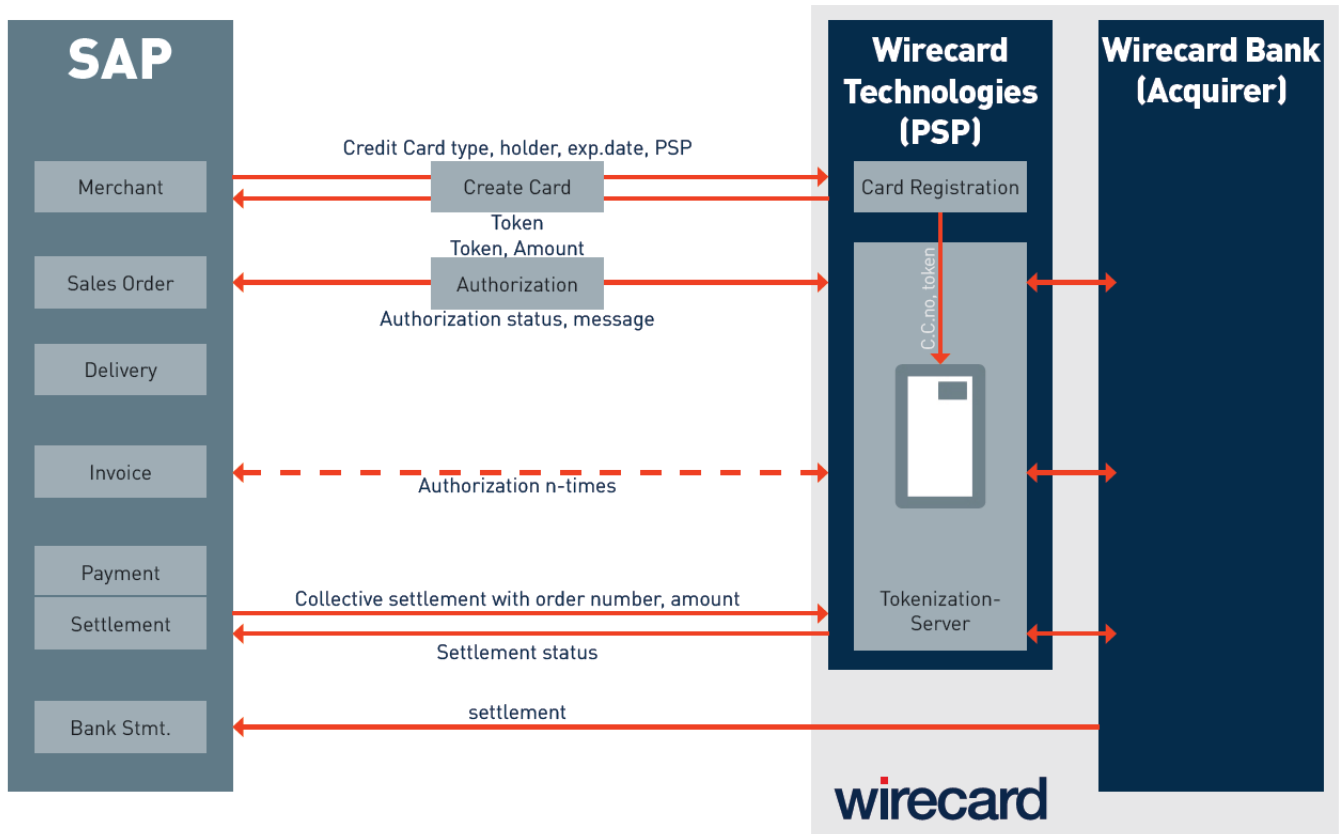

## Benefits of this integration into SAP Business ByDesign

- Payments from a single source: PCI DSS compliant payment service solution & acquiring services.
- Fraud prevention tools can be accessed without any additional technical adaptations.
- Acquiring services provided through Wirecard Bank AG, a fully-licensed German bank, principal member of Visa, Mastercard and JCB and licensed acquirer for Diners Club, Discover, China Union Pay and JCB.
- Multi-currency banking solutions for payment processing and settlement of funds (including currency conversion).
- Multi-channel solutions: Solutions for all available sales channels including e-Commerce, mobile and point of sale are consolidated via Wirecard.
- Minimized integration efforts: SAP Business ByDesign seamlessly pre-integrated with Wirecard payment gateway.

## Process overview

### Credit card process flow

#### (SAP-by-D-Wirecard Technologies (PSP)-Wirecard Bank (Acquirer))

1. On behalf of the customer, your agent registers credit card/debit card and stores token to customer's information in a PCI DSS compliant way.
2. After credit card/debit card is initially registered within SAP Business ByDesign, credit card/debit card MOTO transactions can be triggered at any time.
3. Last step is to trigger the settlement process from within SAP Business ByDesign which is usually done on a daily basis.

The following back-office operations are supported:

- Approve reversal
- Deposit
- Recurring payment
- Refund

With the technical integration of SAP Business ByDesign and Wirecard Checkout Seamless, you gain access to Wirecard Bank AG's acquiring solutions for acceptance of credit/debit cards (Visa, Mastercard, American Express, Diners Club, Discover and JCB).

Wirecard Bank AG is a fully licensed German bank, regulated by German banking authority BaFin and member of the security deposit fund. Further to your accounts for card not present acceptance (MID), corporate bank accounts, currency conversion, multi-currency solutions and issuing products are available.
