Integration into Shop Systems

IMPORTANT INFORMATION

You are visiting online documentation which will become obsolete in the near future. Please take a look at our new online documentation, which describes in more detail how to integrate the Wirecard Payment Gateway into your online shop.

There are several shop systems allowing consumers to directly buy goods or services over the Internet. Wirecard Checkout Page and Wirecard Checkout Seamless can be integrated into shop systems. For some shop systems we offer plugins which are maintained by Wirecard CEE. Some shop systems already have their own integration. Also there are market places you may use which already have our solutions integrated.

For a selection of our integration partners visit wirecard.at.

Integration via plugins

Our solutions can be integrated by downloading, installing and configuring a plugin, which is a software component tailored for the specific shop system, adding Wirecard Checkout Page and Wirecard Checkout Seamless. We offer free of charge shop plugins for a great number of shop systems.

Please have a look at General information regarding the use of the plugins within your shop system. For the relevant security issues, please visit [Securing your online shop](#).

The following shop systems are supported by Wirecard Checkout Page and Wirecard Checkout Seamless:

Shop system	Wirecard Checkout Page Currently available plugin version	Wirecard Checkout Seamless Currently available plugin version
ePages	v2.3.1	
Gambio	v2.2.8	v1.2.7
JTL-Shop	v1.0.13	
Magento 1.x	v4.2.7	v4.2.8
Magento 2	v1.0.13	v1.0.13
modified eCommerce	v2.0.3	v1.0.6
OpenCart	v2.0.1	
osCommerce	v1.6.2	

OXID eSales	v2.8.3	v2.2.5
PrestaShop	v2.1.3	v2.0.5
Salesforce Commerce Cloud (Demandware)	v1.1.0	
SAP Event Ticketing		v1.1.0
Shopware	v1.6.2	v1.10.14
Ubercart (Drupal)	v1.2.3

WooCommerce (WordPress)	v1.3.9	v1.0.18
xt:Commerce 3	v1.11.4	
xt:Commerce 4/5 (Veyton)	v1.6.7	

You can use the plugins in demo and test mode for checking your integration using the demo mode and test mode for Wirecard Checkout Page and the demo mode and test mode for Wirecard Checkout Seamless.

For detailed technical information you can use the description of the request and response parameters used for communication between your shop (and shop plugin) and Wirecard Checkout:

- Request parameters
- Response parameters

Please be aware that there are many web sites offering various shop plugins including Wirecard CEE as payment service provider. This is based on the idea of an open Wirecard Checkout interface which can be integrated and used by everyone. However, if you want to use a shop plugin developed and maintained by Wirecard CEE, please only use one of the plugins listed on this page.

Third-party developments

Since the interface for Wirecard Checkout Page and Wirecard Checkout Seamless is openly documented, third-party developers also provide integration possibilities.

- Easy Digital Downloads
 - Wirecard Checkout Page
- Isotope e-commerce for Contao CMS
 - Wirecard Checkout Page
- Jigoshop
 - Wirecard Checkout Page
- Randshop
 - Wirecard Checkout Page
- WooCommerce
 - Wirecard Checkout Page
- Zen Cart
 - Wirecard Checkout Page - Credit Card
 - Wirecard Checkout Page - eps-Überweisung

Please be aware that Wirecard CEE cannot offer any support regarding these third-party developments.
