# Wirecard Shop Plugin for modified eCommerce

## Installation guide for Wirecard Checkout Page

This installation guide will show you the step-by-step installation of the plugin to your installed shop system on your web server. Please test your online shop and the configuration of the plugin on a test system, before you install the plugin on your production system.

### Step 1

**Since changes in the database will occur during the plugin installation process, you have to uninstall the old plugin before installing the new plugin.**

Upload the zip file containing the Wirecard Checkout Page plugin to the document root of your modified eCommerce installation and unzip the file. The zip-archive already contains the directory path allowing the plugin to be stored automatically in the right folder.

If you need to unzip the file on your own computer and then upload the plugin, please maintain the directory structure which already exists in the zip file.

Next you need to install the plugin in the shop administration (simply extracting the files is not enough), in the main menu go to "Payment Modules" → "Payment Methods":

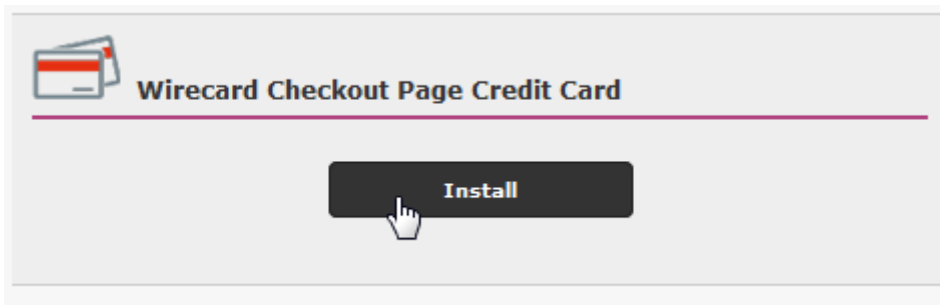

The screenshot shows the 'modified' CMS interface. The top navigation bar includes 'Home', 'Customers', 'Catalog', 'Modules', 'Partner Modules', 'Statistics', 'Tools', 'Zones/Tax', 'Configuration', and 'Adv. Configuration'. The 'Modules' menu is open, showing options like '-Payment Methods', '-Shipping Methods', '-Order Total', '-Class Extensions Modules', '-Google Sitemap', '-System Modules', and '-Export Modules'. Below the menu is a table of installed modules.

Modules	Module name (for internal usage)
Wirecard Checkout Page Credit Card	wcp_ccard
Wirecard Checkout Page Masterpass	wcp_masterpass
Wirecard Checkout Page PayPal	wcp_paypal
Wirecard Checkout Page SEPA Direct Debit	wcp_sepa
Wirecard Checkout Page Invoice	wcp_invoice
Wirecard Checkout Page giropay	wcp_giropay
Wirecard Checkout Page Bancontact	wcp_bmc

## Step 2

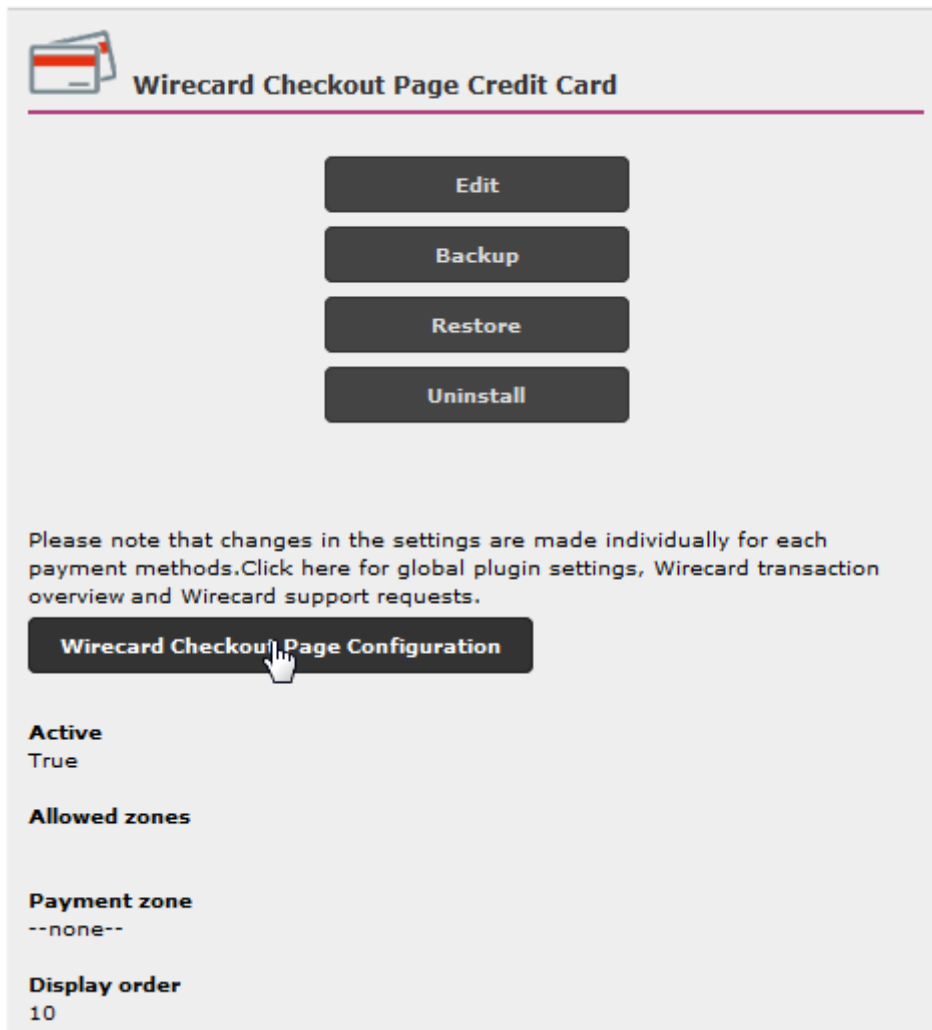

If you have already installed an older version of the plugin, it's important to remove the old plugin first.

Select and install the Wirecard Checkout Page plugin:

## Step 3

After installing the plugin you have to configure the plugin by clicking the "Edit" button:

The screenshot shows the configuration page for the Wirecard Checkout Page Credit Card plugin. At the top left is the Wirecard logo. The title is "Wirecard Checkout Page Credit Card". Below the title are four buttons: "Edit", "Backup", "Restore", and "Uninstall". A note states: "Please note that changes in the settings are made individually for each payment methods. Click here for global plugin settings, Wirecard transaction overview and Wirecard support requests." Below the note is a button labeled "Wirecard Checkout Page Configuration" with a mouse cursor pointing to it. The settings are listed below:

- Active**  
True
- Allowed zones**
- Payment zone**  
--none--
- Display order**  
10

## Step 4

Set your Customer ID, the Secret and the URL to contact page. Please note that these three fields are mandatory fields.

Wirecard Checkout Page Configuration

Wirecard - Your Full Service Payment Provider - Comprehensive solutions from one single source

Wirecard is among the independent global leaders in outsourcing and white label solutions for electronic payment transactions.

As an independent supplier of payment solutions, we support our customers at every step of their business development. Our custom-tailored payment solutions are committed.

Finally, verify that the Wirecard Checkout Page **Payment method** screen is displayed on the checkout page:

## Payment method

**PAYMENT METHOD**

---

Please select payment method.

- Credit Card ▲  

- Masterpass ▼
- PayPal ▼
- SEPA Direct Debit ▼
- Invoice ▼
- giropay ▼
- Bancontact ▼

## FAQ

***I enabled Invoice or Installment as payment method in the administration panel. Why is none of these two shown on my shop frontend page?***

Invoice and installment are only visible if the criteria defined in your contract concluded with the financial institution (e.g. payolution) are met. For more information please check the payment method specific documentation for your invoice/installment provider payolution: Invoice and Installment.
