Wirecard Shop Plugin for PrestaShop

Installation guide for Wirecard Checkout Page

This installation guide shows the step-by-step installation of the plugin to your installed shop system on your web server. Please test your online shop and the configuration of the plugin on a test system before installing the plugin on your production system.

Step 1

Upload the .zip package to your PrestaShop (Modules → Modules → Add a new module)

Step 2

Install the module by clicking “Install”.

Step 3

Go to Plugin configuration and change the settings of the plugin (“Modules” → “Modules” → “Payments and Gateways” → “Wirecard Checkout Page” → “Configure”).

≡ MODULES LIST

The screenshot displays the PrestaShop Modules List interface. On the left, there is a search bar with 'Wirecard' entered and a sidebar menu with categories: Favorites (0), All (210), Administration (17), Advertising and Marketing (10), and Analytics and Stats (28). The main area shows a list of modules with filters for 'Installed & Not Installed', 'Enabled & Disabled', and 'Authors' (All authors). The 'Wirecard Checkout Page v1.4.0 - by Wirecard CEE' module is highlighted, showing its category as 'Payments and Gateways' and its description as 'Wirecard Checkout Page payment module'. A 'bulk actions' dropdown menu is visible below the module entry.

Step 4

Change the settings according to your requirements.

For a detailed description of all values and their meaning see Request Parameters.

If you set the minimum and maximum amount for invoice and installment these payment methods will only be shown to your consumer in your online shop if the order is between these limits.

Select `orderNumber` or `gatewayReferenceNumber` to be displayed as Transaction ID in the order summary of the shop's backend.

FAQ

How do I change the payment method images on the payment method selection page?

Replace the corresponding images located in:
prestashop/modules/wirecardceecheckoutpage/img/payment_types.

How do I change the shop currency?

In order to use a new currency, you have to perform two steps:

1. **Define currency:** On your PrestaShop admin site, go to Localization -> Currencies.
2. **Activate currency:** On your PrestaShop admin site, go to Modules and Services -> Payment -> Currency Restrictions.
Enable the checkbox for Wirecard Checkout Page.

Is there any assistance for debugging?

For debugging purposes, you might search the log files on your PrestaShop admin site -> Advanced Parameters -> Logs.
