# Wirecard Checkout Seamless

## IMPORTANT INFORMATION

You are visiting online documentation which will become obsolete in the near future. Please take a look at our new online documentation, which describes in more detail how to integrate the Wirecard Payment Gateway into your online shop.

Wirecard Checkout Seamless is a sophisticated and secure possibility for seamlessly integrating a payment process into your online shop. There is no need to manage and store sensitive payment data in your online shop, thus you do not need to be PCI compliant, but you can directly integrate all relevant input fields for payments seamlessly into your online shop interface. Thus can customly design every step of the checkout process.

If you are new to e-commerce and first need some basic information especially for defining the checkout process in your online shop, we have compiled for you A Comprehensive Guide to Payment which provides extensive background information and contains the most important milestones summed up in chronological order.

For an overview of this payment solution visit [wirecard.at](https://www.wirecard.at).

## Integration guide

The following chapters provide you with all the necessary information and knowledge on Wirecard Checkout Seamless to ensure a smooth integration into your online shop and a successful customization based on your specific design requirements.
